(a) A background investigation will be conducted through JMSDF or other appropriate authority.

(b) COMFLEACT, Yokosuka exercises final authority over all base access.

14. DBIDS Validation. The primary function of Gate Operations is to validate access authorization of ID card holders, the status of the DoD identification card, their vehicles, and any other personnel attempting to enter the installation. This

JUL 23 2010

clarifies that personnel authorized to enter the installation are in fact using a valid identification card to enter FLEACT, Yokosuka. DBIDS enhances the military law enforcement mission by helping to provide a safe and secure community and by allowing real-time access to data for the installation. The Gate system consists of two primary components: the Gate workstation (either a personal computer or a laptop computer) and the DBIDS Handheld scanner. Both the pistol scanner at the Gate workstation and the Handheld scanner at the guard shack have the functionality to scan an ID card. The Gate computer or Handheld scanner submits the data from the barcode scan to the local database to determine if the individual is authorized access to a given installation. The Gate guard scans an individual's ID card with the Handheld scanner at all gates.

After validation of their ID by DBIDS Handheld scanner, they are allowed to enter base. ID card scanning is conducting for all times except during rush hours.
